The following table lists all cities with populations over 50,000 that are within 350 miles of Beaumont, TX (highlighted in blue) and their distances in statute miles (straight-line) from that city. In addition, other major metropolitan cities are shown for comparative purposes.

You may approximate the driving times (in hours) by taking the mileage figure and dividing it by 60. Please note straight-line distances can vary from the actual driving distance by a wide margin if a direct route between cities does not exist.
